

JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

www.fedgas.com

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

GAS RATES

Gas Alberta – Meota’s gas wholesaler, continues to provide very competitive rates for our members. In 2023, we saw rates as high as \$ 6.10/GJ (January) and have seen a steady decline since. Our lowest monthly rate was \$ 1.70 in June and we have held steady at an average of \$ 2.46/GJ for the 11 months from February to December 2023. (*NB chart below does not include Gas Alberta’s variable rate of .24/GJ).

Intra-Alberta Cost of Natural Gas						
Month	Monthly Index	Daily Index	Gas Alberta Inc.	DERS	AUI	Wtd Avg
Jan-23	\$5.77	\$3.54	\$6.10	\$6.446	\$6.405	\$6.442
Feb-23	\$3.91	\$2.65	\$3.20	\$3.715	\$3.176	\$3.661
Mar-23	\$2.67	\$2.97	\$2.15	\$2.222	\$2.851	\$2.285
Apr-23	\$2.62	\$2.37	\$2.75	\$3.381	\$3.756	\$3.419
May-23	\$2.04	\$2.29	\$1.80	\$2.415	\$2.083	\$2.382
Jun-23	\$2.01	\$2.31	\$1.70	\$2.452	\$4.274	\$2.634

JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

www.fedgas.com

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

GAS RATES

Gas Alberta – Meota’s gas wholesaler, continues to provide very competitive rates for our members. In 2023, we saw rates as high as \$ 6.10/GJ (January) and have seen a steady decline since. Our lowest monthly rate was \$ 1.70 in June and we have held steady at an average of \$ 2.46/GJ for the 11 months from February to December 2023. (*NB chart below does not include Gas Alberta’s variable rate of .24/GJ).

Intra-Alberta Cost of Natural Gas						
Month	Monthly Index	Daily Index	Gas Alberta Inc.	DERS	AUI	Wtd Avg
Jan-23	\$5.77	\$3.54	\$6.10	\$6.446	\$6.405	\$6.442

JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

GAS RATES

Gas Alberta – Meota’s gas wholesaler, continues to provide very competitive rates for our members. In 2023, we saw rates as high as \$ 6.10/GJ (January) and have seen a steady decline since. Our lowest monthly rate was \$ 1.70 in June and we have held steady at an average of \$ 2.46/GJ for the 11 months from February to December 2023. (*NB chart below does not include Gas Alberta’s variable rate of .24/GJ).

Intra-Alberta Cost of Natural Gas						
Month	Monthly Index	Daily Index	Gas Alberta Inc.	DERS	AUI	Wtd Avg
Jan-23	\$5.77	\$3.54	\$6.10	\$6.446	\$6.405	\$6.442
Feb-23	\$3.91	\$2.65	\$3.20	\$3.715	\$3.176	\$3.661
Mar-23	\$2.67	\$2.97	\$2.15	\$2.222	\$2.851	\$2.285
Apr-23	\$2.62	\$2.37	\$2.75	\$3.381	\$3.756	\$3.419
May-23	\$2.04	\$2.29	\$1.80	\$2.415	\$2.083	\$2.382
Jun-23	\$2.01	\$2.31	\$1.70	\$2.452	\$4.274	\$2.634
Jul-23	\$1.87	\$2.35	\$2.20	\$2.273	\$2.622	\$2.308

JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

www.fedgas.com

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

GAS RATES

Gas Alberta – Meota’s gas wholesaler, continues to provide very competitive rates for our members. In 2023, we saw rates as high as \$ 6.10/GJ (January) and have seen a steady decline since. Our lowest monthly rate was \$ 1.70 in June and we have held steady at an average of \$ 2.46/GJ for the 11 months from February to December 2023. (*NB chart below does not include Gas Alberta’s variable rate of .24/GJ).

Intra-Alberta Cost of Natural Gas

JANUARY 2024

December 2023	Gas Rate \$ 2.94/GJ
January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. January 2024	Gas Rate \$ 2.24/GJ

The Board of Directors and Staff of Meota Gas Co-operative Association Ltd., wish you a very Happy New Year!

50 YEARS OF COLLABORATION

2023 marked 50 years of collaboration between the natural gas co-operatives, municipalities and First Nations gas utilities – the members of the Federation of Alberta Gas Co-op Ltd. The Federation of Alberta Gas Co-ops is an umbrella organization comprised of 82 Natural Gas Utilities from the northern reaches of Alberta's Peace Country to the United States border and from Saskatchewan border to the foothills. Communities serve family farms, acreage subdivisions, towns and villages, large industries and everything in between. The local utility employees construct pipelines, install meters, perform billing and maintain the systems, providing clean and safe natural gas delivery.

The Federation provides centralized services to its' member utilities including training, insurance coverage, operations & maintenance guidelines, gas measurement and inspection services, odourant services, to name a few.

As a member of the Federation, Meota Gas benefits greatly from the services that are provided by the Federation and helps ensure we keep our gas rates as low as possible.

2023 – TC PROJECT

In 2023, Meota Gas was required to complete major construction line moves to accommodate Nova Gas Transmission Ltd.'s (TC Energy) expansion of a 48" line through our franchise area. The execution of this project involved hiring contractors experienced in this line of work with the proper equipment and staff to do so safely. Meota's portion of this project started in February of 2023 and was wrapped up and completed in September. Meota successfully completed all portions of this project including estimating, project management, material procurement, sub-contractor management, line locating, rig matting and line construction. This took the equivalent of one full-time Meota staff member the entire year. All line moves were paid for by Nova Gas (TC Energy) which allowed Meota to operate its system without any financial burden to the project. Some of the funds earned from this project will be put towards long overdue building upgrades needed at the Meota office to sustain the building and structure. Items may include a much-needed furnace replacement, front window replacements, front building structural repair on the deck and overhang.

Meota staff wear many hats, and while the general public may not understand the efforts and team work that it took to complete this project and ensure the safety of our staff and customers, I can assure you that this was quite an undertaking for such a small cooperative that Meota is. If you come into contact with any of our staff, please extend them an appreciation for this job well done. It took the entire team to make this happen! Meota thanks Nova Gas for its support and help to ensure this project was executed safely and efficiently.

2023 – SUMMARY

Staff compliment - Meota staff wear many hats at any given time. This includes safety, human resources, regulatory compliance, customer service, engineering, billing, locating lines, construction, system upgrades, maintaining the system and RMO stations and while doing so, we maintain our yards with mowing, weed control, snow removal, etc. This is accomplished only with the right staff, skill sets and a true team. Meota currently has three service technicians who work hard all year to fulfil their roles, the increasing requirements of their roles and to ensure your natural gas supply remains constant and safe.

Some of our 2023 challenges included increased safety requirements for compliance and regulation. We cannot always do this alone and so we collaborate with other gas co-operatives and share resources and information as much as we can.

Inflation – since the pandemic, the cost of materials has skyrocketed; components on a standard gas meter have increased between 20 and 80%. Wages have increased 8-18%, which in turn drives up the pension and benefit costs. As well, insurance rates continue to increase. Fleet costs for trucks has increased over 30%.

Rates – Meota’s elected Board of Directors regularly reviews rates to ensure our system is maintained, our compliance needs are met and that we have the appropriate staff in place. With the pressures of increasing costs, Meota’s Board has approved a slight increase to the 2024 rates. Please visit our website for details.

GAS RATES

Gas Alberta – Meota’s gas wholesaler, continues to provide very competitive rates for our members. In 2023, we saw rates as high as \$ 6.10/GJ (January) and have seen a steady decline since. Our lowest monthly rate was \$ 1.70 in June and we have held steady at an average of \$ 2.46/GJ for the 11 months from February to December 2023. (*NB chart below does not include Gas Alberta’s variable rate of .24/GJ).

Intra-Alberta Cost of Natural Gas						
Month	Monthly Index	Daily Index	Gas Alberta Inc.	DERS	AUI	Wtd Avg
Jan-23	\$5.77	\$3.54	\$6.10	\$6.446	\$6.405	\$6.442
Feb-23	\$3.91	\$2.65	\$3.20	\$3.715	\$3.176	\$3.661
Mar-23	\$2.67	\$2.97	\$2.15	\$2.222	\$2.851	\$2.285
Apr-23	\$2.62	\$2.37	\$2.75	\$3.381	\$3.756	\$3.419
May-23	\$2.04	\$2.29	\$1.80	\$2.415	\$2.083	\$2.382
Jun-23	\$2.01	\$2.31	\$1.70	\$2.452	\$4.274	\$2.634
Jul-23	\$1.87	\$2.35	\$2.20	\$2.273	\$2.622	\$2.308
Aug-23	\$2.35	\$2.60	\$3.00	\$3.368	\$3.061	\$3.337
Sep-23	\$2.56	\$2.43	\$2.60	\$2.724	\$2.973	\$2.749
Oct-23	\$2.33	\$2.27	\$2.35	\$2.522	\$2.468	\$2.517
Nov-23	\$2.60	\$2.50	\$2.65	\$2.850	\$2.718	\$2.837
Dec-23	\$2.62	\$1.78	\$2.70	\$2.902	\$2.751	\$2.887

Actual prices are based on a volume weighted average of transacted prices for all physically delivered natural gas at the Alberta AB-NIT market center (www.ngx.com). *Disclaimer: All information provided is deemed reliable, but is not guaranteed and should be independently verified.*
