ANNUAL GAS LEAK SURVEY

We maintain and operate many kilometres of pipeline to distribute natural gas to your homes and businesses. To ensure the integrity of our system, we perform an annual gas leak survey of the distribution system.

The distribution system is divided into geographical areas with one-third of the system being checked annually. Therefore, within a three-year period, the entire system is checked entirely. In 2025, the annual leak survey will run from July through October.

Alberta One Call is now called Utility Safety Partners

Any ground disturbance on your property requires locates booked through Utility Safety Partners. Landscaping, new fencing or decks, or even planting a garden is ground disturbance and can cause damage to a buried utility. Some utilities are buried only centimeters below the surface.

The results of a contact with a buried utility can be loss of an essential service for you or your neighbours, costly repairs, and most importantly serious injury or death.
