LOCATE YOUR LINES – BEFORE YOU DISTURB ANY GROUND!

CLICK BEFORE YOU DIG – UTILITY SAFETY PARTNERS (FORMERLY ALBERTA ONE-CALL)

Natural Gas pipelines are buried underground, so it's easy to forget that natural gas is flowing all day, every day. Natural gas lines can be damaged because of failure to take a simple (but very important) safety measure before digging.

CLICK BEFORE YOU DIG and request a line locate to prevent damage, ensure public safety and avoid the inconvenience of outages.

If you are planning landscaping, construction, home addition, fence installation, porch/deck addition or any temporary structure, including modifications to existing structures, please notify Utility Safety Partners for a locate request.

Visit Click Before You Dig and within 96 hours, we will locate any natural gas lines on and around your property for free.

– Obtaining a line locate before excavation work is a legal requirement of Alberta Occupational Health & Safety and Pipeline Regulations.

– Damages to underground natural gas pipelines may result in personal injury, legal action, expensive repair costs and interruption of gas service.

– Line locates expire after 30 days – provided all the original staking flags are in place and are only covered by the work area indicated on the locate.

Thank you for helping Meota Gas maintain safe communities.

ANNUAL GAS LEAK SURVEY

We maintain and operate many kilometres of pipeline to distribute natural gas to your homes and businesses. To ensure the integrity of our system, we perform an annual gas leak survey of the distribution system. The distribution system is divided into geographical areas with one-third of the system being checked annually. Therefore, within a three-year period, the entire system is checked entirely. For 2025, we will be walking lines and completing the annual leak survey from July to October.

SUMMER CONSTRUCTION

Summer construction projects are in the planning stages and 2025 will include some system upgrades in our area. We are in the process of planning and construction will begin in late July/August.

If your property is directly affected by any of Meota's construction activities, we will be in touch with you directly to keep you informed of activity plans and timelines.

If you are planning any construction activities to your home that may require alterations or changes to your natural gas service lines, please contact us **as soon as possible** to get your project estimated and in the construction queue.

NATURAL GAS DELIVERIES

Member-owned Utilities

Meota Gas owns the gas distribution system that delivers natural gas to our customers in our franchise area. We operate and maintain the gas distribution system, install meters and secondary pipelines, and provide meter reading services. Our pricing is market-based, as compared to "customer choice" as offered by investor-owned utilities to their consumers. In addition to the cost of natural gas provided by Gas Alberta, Meota recovers our distribution and operating costs through

our monthly billing process. We set monthly rates with the approval of our locally elected board of directors on an annual basis.

Investor-owned Utilities

ATCO Gas North and ATCO Gas South are investor-owned utilities that own and operate the gas distribution systems in their franchise areas that deliver to their consumers the natural gas supplied by DERS (Direct Energy Regulated Services). AUI (Apex Utilities Inc.) carries out both the purchasing and delivery functions for consumers in their franchise areas.

The following chart summarizes the monthly rates charged by the investor-owned utilities to deliver natural gas to their consumers. These rates are designed to recover the utilities' natural gas delivery costs and other expenses, and are approved by the Alberta Utilities Commission (AUC).

Utility Safety Partners

Any ground disturbance on your property requires locates booked through Utility Safety Partners. Landscaping, new fencing or decks, or even planting a garden is ground disturbance and can cause damage to a buried utility. Some utilities are buried only centimeters below the surface.

The results of a contact with a buried utility can be loss of an essential service for you or your neighbours, costly repairs, and most importantly serious injury or death.
